### **MiG CONSTRUCTION BRIAN DEMING RECEIVES LEED ACCREDITED PROFESSIONAL CERTIFICATION**

**Detroit, Mich.**, May 28, 2009 —Brian Deming, PE, Senior Project Manager with MiG Construction, obtained his Leadership in Energy and Environmental Design professional accreditation (LEED AP). The LEED AP program is administered by the Green Building Certification Institute (GBCI) established with the support of US Green Building Council. LEED APs demonstrate a thorough understanding of green building techniques, the LEED Green Building Rating System, and the certification process for new and used construction projects.

The USGBC LEED standards are tools to guide progress toward the adoption of innovative building practices that conserve land, energy, water, resources and material. LEED is the nationally accepted benchmark for the design, construction and operation of high-performance green buildings.

This accreditation supports MiG Construction's service to our clients demand of projects that create an environment that is sustainable, practical, and economically feasible.

Deming has more than 15 years in the construction industry. He earned his bachelors and masters of civil engineering from Wayne State University, and has been a licensed engineer since 1998.

MiG Construction is an award winning, nationally integrated construction solutions firm servicing boutique tenant improvement to large-scale ground up projects across the United States. With over 45 years industry experience, Paul Jenkins - CEO, leads MiG's passionate team of safety focused professionals offering design development, design/build, general contracting, construction management and pre / post construction services throughout the private and government development arenas.
